Haitam Tedbir

Digital Engineering & AI in Healthcare Student

A student in Digital Engineering and Artificial Intelligence in Healthcare, I combine solid technical training (a diploma in Computer Systems and Networks) with hands-on field experience spanning team management, content creation, and IT support. Curious and versatile, I aim to put my technical and interpersonal skills to work on innovative projects that bridge digital technology and healthcare.

TECHNICAL SKILLS

Front-End Development:	HTML5, CSS3, JavaScript, responsive web interface design
Back-End Development:	Python, C++, MySQL, Oracle Database
AI & Digital Health:	Artificial intelligence, data processing and analysis, Machine Learning fundamentals, digital health applications
Systems & Networks:	Windows & Linux administration, computer networks, IT security, Windows Server
Languages:	Arabic (native), French (fluent), English (intermediate)

WORK EXPERIENCE

IT & Digital Solutions Intern

08 2026 — Present

Casablanca, Morocco

- Developed responsive web pages using HTML5, CSS3, and JavaScript.
- Designed and implemented modern, responsive user interfaces.
- Added interactive features and dynamic elements in JavaScript.
- Improved the site's structure, styling, and user experience.
- Collaborated on web development projects following front-end best practices.

Lead Sales Associate (Co-Manager)

10 2024 — 05 2026

Mohammedia, Morocco

- Managed a team and tracked performance indicators (revenue, margin, profitability).
- Mentored and trained new team members.
- Organized commercial operations (sales events, seasonal peak periods).

Video Editor and Content Manager

06 2022 — 10 2024

Freelancer

- Edited video content using Adobe Premiere Pro and After Effects for multiple platforms (YouTube, Instagram, TikTok).
- Collaborated with creative teams to produce engaging content.

Help Desk – Internship

04 2022 — 06 2022

Mohammedia, Morocco

- Provided technical support to users: assistance and troubleshooting of IT issues.
- Installed, configured, and maintained workstations, printers, and other peripherals.
- Managed the network: diagnosed and resolved connection issues, configured switches and routers.
- Updated and maintained software: installed applications and ensured system compliance.

PROFESSIONAL CERTIFICATIONS
